

Bring your industrial facility up to the latest technology standards with Retrofit and Modernization Services

Retrofit and Modernization Services

The goal of Retrofit and Modernization Services: Drive trains, automation and process systems need to always run both safely and reliably. So, they can easily come up against their limits. Thus, plant operators need intelligent concepts and solutions to achieve their productivity and performance targets, while protecting their investments.

Drive systems

Motors and converters need to run both safely and reliably. Our service offerings extend the lifetime of your assets by providing the right retrofit solutions.
